

Eye Spy Signs P/L has a long and successful history in commercial signage. We have the technology, infrastructure and manpower to undertake even the most demanding signage tasks.

Infrastructure includes a 1000m² factory and showroom complex on the edge of the Hobart CBD, a vehicle fleet including 4 flat tray utes and a 10 tonne fully configured installation truck.

We hold considerable stocks of raw materials - metal sheeting in coils and packs of aluminium sheet, vinyls - both reflective and opaque colours. This enables us to buy at the right price and to ensure materials are on hand when we need them.

In addition we have built considerable stocks of signs, particularly road signs which allows us to operate at maximum efficiency.

We continue to update our equipment and have some of the most up-to-date signage creation devices.

We now run 4 signage production computers and a wide format digital printer/cutter. This allows us to produce full colour output at a fraction of the cost.

The company has extensive screen printing facilities and a full time screen printer which allows us to tackle jobs involving technical expertise or high volume.

Fabrication is simplified - for us to do 'in house', because of our fully equipped workshop containing guillotines, folders, benders, saws, cutters, welders, drills, hydraulic presses etc.
