

## SAFETY LINE

EYE SPY SIGNS P/L manufactures safety line at it's Hobart factory. The cord is extremely strong and elastic - so it won't droop overnight!

The tabs are highly reflective and are double sided - red one side and white the other side.

The line is available in a standard pack of 25 metres - other lengths, if required, are available upon request.  
Product Code: #ESS - SL25

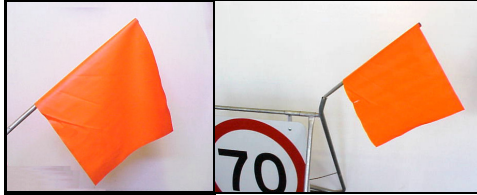

## HAZARD NET

This is ideal for any worksite where a more conspicuous 'barrier' or delineation is required. It is very economical and provides high visibility, even in poor weather conditions.

It is lightweight for easy transportation and installation and has excellent UV and weather resistance.

Hazard Net is available in rolls of 50 metres and it has a standard depth of 900mm.  
Product Code: #ESS - HAZNET

## FFLAG

Fluoro flags - use in conjunction with other workzone safety signs to attract more attention

## BUNTING

This is ideal for passive delineation. It can be used around temporary worksites for daytime delineation. It is inexpensive and easy to use.

Available in 25 metre rolls.  
Flag size 300 x 190mm.  
Product code: #ESS-BUNTING

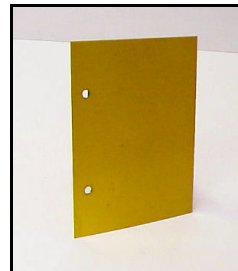

HAZLAMP

Hazard flashing lamps - ideal for night time work zone hazard warning. LED automatic operation means low power use. They automatically come on when it's dark! Batteries also available.  
(Code: HAZBATT)

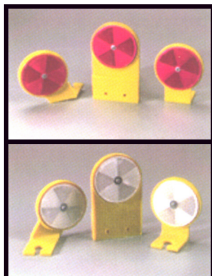

CCUBE

Corner cube delineators. DIER compliant. Hole in middle for easy fastening.  
Colours:  
Red  
White  
Amber  
Blue  
Green

DELPL

Delineator plate. Double sided. Two holes for attachment to star pickets.  
Size 150 x 250mm

GDB

Flexible guardrail delineator brackets. DIER compliant. Can be attached to either the post, for vertical delineation, or on top of the W-beam set at 45 degrees. Available with or without corner cubes.

TRPM

Temporary raised pavement markers. Highly flexible with the ability to return to the upright position time and time again.

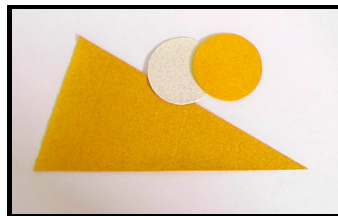

The retro-reflective strip is protected from dirt and oil by a clear strip which can be removed after the sealing operations have been completed.

The self adhesive pads on the TRPM makes fixing so easy - just peel the release paper from the pad, place in position and stand on it!

RPM

Raised pavement markers for permanent roadway markings. Glass faced and highly durable. Available with a bitumen pad (Code:BITPAD) for installation to the road surface. Various colours and combinations - includes blue for fire hydrant identification.

HOTAPE - Preformed thermoplastic pavement markings for traffic control solutions.

- \* Excellent retroreflectivity by incorporating both large and normal sized glass beads.
- \* No primers or adhesives needed.
- \* Impervious to oil and grease.
- \* Bonds to all primary substrates.
- \* Available precut to any required shape.
- \* Colours: white, yellow, blue and black.
